## Intimate Care Policy

**Adopted by:** Chestnuts Primary School

**Dated:** April 2014

<b>Date of Issue:</b> April 2014	
<b>Status:</b> (Every Two Years)	<b>Reviwed:</b> April 2014
<b>Status:</b> This policy should be reviewed every 2 years by the ECC Committee	

## **1.0 INTRODUCTION**

Chestnuts Primary School is fully inclusive and as such will provide education for children with a whole range of special needs. These needs may be permanent needs or sometime in a community primary school they may be temporary whilst children are recovering from illness. We also provide education to young children who may not always be confident with their toileting and may be prone to "accidents". This will require staff to wash, change and clean children. This policy and guidance is designed to help and support our staff and offer guidance to parents on how we care for the individual needs of children.

This policy has been adopted from Haringey Children & Young People Service Guidance and covers all aspects of intimate care.

- 1.1 Staff who work with young children or children/young people\* who have special needs will realise that the issue of intimate care is a difficult one and will require staff to be respectful of children's needs.
- 1.2 Intimate care can be defined as care tasks of an intimate nature, associated with bodily functions, body products and personal hygiene which demand direct or indirect contact with or exposure of the genitals. Examples include care associated with continence and menstrual management as well as more ordinary tasks such as help with washing or bathing.
- 1.3 Children's dignity will be preserved and a high level of privacy, choice and control will be provided to them. Staff who provide intimate care to children have a high awareness of child protection issues. Staff behaviour is open to scrutiny and staff at [name of school/ establishment] work in partnership with parents/carers to provide continuity of care to children/young people wherever possible.
- 1.4 Staff deliver a full personal safety curriculum, as part of Personal, Social and Health Education, to all children as appropriate to their developmental level and degree of understanding. This work is shared with parents who are encouraged to reinforce the personal safety messages within the home.
- 1.5 Chestnuts Primary School is committed to ensuring that all staff responsible for the intimate care of children will undertake their duties in a professional manner at all times. Chestnuts Primary School recognises that there is a need to treat all children with respect when intimate care is given. No child should be attended to in a way that causes distress or pain.

## **2.0 OUR APPROACH TO BEST PRACTICE**

- 2.1 All children who require intimate care are treated respectfully at all times; the child's welfare and dignity is of paramount importance.
- 2.2 Staff who provide intimate care are trained to do so (including Child Protection and Health and Safety training in moving and handling) and are fully aware of best practice. Apparatus will be provided to assist with children who need special arrangements following assessment from physiotherapist/ occupational therapist as required.
- 2.3 Staff will be supported to adapt their practice in relation to the needs of individual children taking into account developmental changes such as the onset of puberty and menstruation. Wherever possible staff who are involved in the intimate care of children/young people will not usually be involved with the delivery of sex and relationship education to their children/young people as an additional safeguard to both staff and children/young people involved.
- 2.4 There is careful communication with each child who needs help with intimate care in line with their preferred means of communication (verbal, symbolic, etc.) to discuss the child's

needs and preferences. The child is aware of each procedure that is carried out and the reasons for it.

- 2.5 As a basic principle children will be supported to achieve the highest level of autonomy that is possible given their age and abilities. Staff will encourage each child to do as much for themselves as they can. This may mean, for example, giving the child responsibility for washing themselves. Individual intimate care plans will be drawn up for particular children as appropriate to suit the circumstances of the child. These plans include a full risk assessment to address issues such as moving and handling, personal safety of the child and the carer and health.
- 2.6 Each child's right to privacy will be respected. Careful consideration will be given to each child's situation to determine how many carers might need to be present when a child needs help with intimate care. If this is the case, the reasons should be clearly documented.
- 2.7 Wherever possible the same child will not be cared for by the same adult on a regular basis; this will usually be the class teacher or the Learning Support Assistant attached to a particular year group. This will ensure, as far as possible, to guard against the care being carried out by a succession of completely different carers.
- 2.8 Parents/carers will be involved with their child's intimate care arrangements on a regular basis; a clear account of the agreed arrangements will be recorded on the child's care plan. The needs and wishes of children and parents will be carefully considered alongside any possible constraints; e.g. staffing and equal opportunities legislation.

### **3.0 THE PROTECTION OF CHILDREN**

- 3.1 Education Child Protection Procedures and Inter-Agency Child Protection procedures will be accessible to staff and adhered to.
- 3.2 Where appropriate, all children will be taught personal safety skills carefully matched to their level of development and understanding.
- 3.3 If a member of staff has any concerns about physical changes in a child's presentation, e.g. marks, bruises, soreness etc. s/he will immediately report concerns to the appropriate manager/ designated person for child protection. A clear record of the concern will be completed and referred to the designated child protection officer. Parents will be asked for their consent or informed that a referral is necessary prior to it being made unless doing so is likely to place the child at greater risk of harm
- 3.4 If a child becomes distressed or unhappy about being cared for by a particular member of staff, the matter will be looked into and outcomes recorded. Parents/carers will be contacted at the earliest opportunity as part of this process in order to reach a resolution. Staffing schedules will be altered until the issue(s) are resolved so that the child's needs remain paramount. Further advice will be taken from outside agencies if necessary.
- 3.5 If a child makes an allegation against a member of staff, all necessary procedures will be followed [see The Education Child Protection Procedures - for access details see 3.3].

*\* where 'children' are mentioned in this document, the term will also include young people.*
